

Qualifications of David C. Landward

Educational Background

I hold a Bachelor of Science degree in mathematics and a Master's Degree in statistics, both from the University of Utah.

Current Employment Responsibilities

I am currently employed by Dominion Energy Services, Inc. as a Regulatory Affairs Consultant. I am involved in rate design and cost of service studies during general rate case proceedings. In addition, I develop forecasts of customer growth, gas demand, and revenue for rate setting, budget planning, and integrated resource planning. I also undertake various other data analyses connected with my department's general work.

Prior Experience

I was hired by Questar Corporation (now part of Dominion Energy, Inc.) in 1994. My initial work was in software and database development. I began providing programming and data acquisition support to the Regulatory Affairs Department in 2004 and became an analyst in the department in 2008. Since that time I have provided analysis in support of many rate cases and other regulatory filings. I have served as an expert witness and presented testimony before the Utah Public Service Commission.
